-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species 1, Figures 2 and 3 (Z-pleat pattern), claims 1-12 and 17 in the reply filed on January 13, 2006 is acknowledged.
2. Claims 1-17 are currently pending. Claims 13-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Claims 1-12 and 17 are being considered for further examination on the merits.

Specification

3. The disclosure is objected to because of the following informality: the comma at the end of the sentence of [0004] should be changed to a period. Appropriate correction is required.
4. The disclosure is objected to. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

On line 1, "invention" is legal phraseology that needs to be removed.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-12 and 17 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Casey, II et al. (USPAP 2004/0019375 A1).

Casey, II et al. disclose a prosthesis for maintaining lumen patency with all the elements of claims 1, 12 and 17. See Figures 1 and 6 for a prosthesis (10) comprising a substantially cylindrical hollow body (11) having a distal end (14) and a proximal end (15). See [0005], [0025], [0026] and [0028] for the body (11) being formed from a self-supporting, non-metallic graft material and at least a portion of the graft material including a plurality of pleats (17) disposed in a Z pattern. The pattern provides radial support to the body (11) while maintaining flexibility.

Claims 2-5, see Figures 1 and 6, lines 3-5 of [0028] and [0034] for distal and proximal anchors (61) in the form of metal support structures being connected to the distal (14) and proximal (15) ends, respectively.

Claims 6-8, see lines 4-6 of [0025] for the graft material being woven, non-woven or knitted.

Claims 9-11, see lines 18-20 of [0025] for the graft material including polyester, polypropylene or polyethylene.
